HAROKOPIO UNIVERSITY OF ATHENS
LIBRARY & INFORMATION CENTRE

Leapspace: An Artificial Intelligence (AI) system designed to provide reliable information based on scientific literature

- Submitting queries in natural language to retrieve the desired information.
- Concise answers provided by LeapSpace, including in-text citations that link directly to the source content and integration with the Mendeley reference management platform.
- Ability to summarize and analyze individual articles and answer questions about their content.
- Ability to ask follow-up questions, making interaction with LeapSpace dynamic and conversational.
- Ability to compare experiments within the same publication and across different publications.
- Ability to summarize objectives, materials, methods, and results across multiple publications.

- **Reference Management Tools**

- Zotero https://www.zotero.org/
- Mendeley https://www.mendeley.com/?interaction_required=true

- **REFERENCES**

A shortened alphanumeric expression (e.g., Bell, 2013), formatted according to a specific citation style, is incorporated into the text and corresponds to a bibliographic entry in the “References” section. In this way, the significance of the cited work is acknowledged at the point where the citation appears (citation).

The full bibliographic details of the source are provided at the end of the text (i.e., author’s name, year of publication, article title, journal title, volume, issue, and page numbers) (reference).

When Should we Use Citations?

ALWAYS, whenever you use:

- Printed sources (e.g., books, journals, newspapers).
- Electronic sources (e.g., articles, websites, blogs, emails, social media).
- Data (e.g., financial, statistical, GIS, demographic data).
- Audiovisual materials (e.g., television programmes, speeches, interviews, music).
- Oral sources (e.g., interviews, lectures, presentations).

HAROKOPIO UNIVERSITY OF ATHENS
LIBRARY & INFORMATION CENTRE

- **Plagiarism**

  Plagiarism is the intentional or unintentional use of another person's ideas and words, presenting them as one's own
- **Copying**: The verbatim reproduction of a large portion or an entire intellectual work and its presentation as the author's own work.
- **Paraphrasing**: Rephrasing another person's ideas without acknowledging the original source from which they were obtained.
- **Misrepresentation**: Presenting work produced in collaboration with others as one's own.
- **Incomplete citation**: Listing sources exclusively in the bibliography while failing to acknowledge and cite them within the text.

AI USE (1/2)

Artificial Intelligence (AI) tools are not capable of critically evaluating sources or verifying facts.

Therefore, any AI-generated responses should be carefully checked and substantiated to avoid misleading errors.

AI IS A TOOL NOT A SUBSTITUTE

- Conducting Research in the Context of Academic Integrity
- Verification of all sources generated by the AI tool in its response
- Critical evaluation of the response, including statistics and conclusions
- Appropriate acknowledgement and citation of AI use

AI USE (2/2)
